Routing Logic & Service Level Agreements (SLA)

1. Service Level Agreement (US-009)

A custom case-level SLA is configured on the Movie Ticket Request case type under Settings > Goal & Deadline to enforce timely processing without complex escalation paths:

Interval	Timeframe	System Action & Urgency Impact
Goal	1 Day from creation	Flags case as approaching deadline; increments case urgency by +10.
Deadline	2 Days from creation	Escalates case priority; increments case urgency by +20.

2. Dynamic Routing by Show Type (US-010)

Within the Booking Execution stage, cases are routed automatically to one of two specialized work queues based on the value of the Show Type property without manual intervention:

Show Type Condition	Target Work Queue	Operational Purpose
Show Type == 'Premium'	PremiumShowQueue	Dedicated queue for VIP lounges, IMAX, and special director screenings.
Show Type == 'Standard' (Default)	StandardShowQueue	General fulfillment queue for regular theatre auditorium screenings.

3. Automated Correspondence Template (US-008)

Upon case completion, dynamic properties are formatted into an automated email dispatched to the Customer persona:

Subject: Movie Ticket Booking Confirmed - [.pyID]

Dear [.CustomerName],

Your movie ticket booking has been successfully confirmed.

Booking Details:

- Case ID: [.pyID]
- Movie Name: [.MovieName]
- Show Date & Time: [.ShowDate] [.ShowTime]
- Number of Tickets: [.NumberOfTickets]
- Seat Numbers: [.SeatNumbers]
- Total Cost: [.TotalCost]

Please arrive at the theatre before show time and present your booking details at entry.

Thank you for choosing our services. Enjoy your movie!
