

CineWave Entertainment

User Stories Specification (US-001 to US-010)

Project Overview

This document specifies the ten core User Stories implemented for the CineWave Entertainment Movie Ticket Request application on Pega Platform. Each story details the persona, functional requirements, and implementation artifacts.

ID	Title & Persona	Functional Requirements & Implementation
US-001	Submit Movie Ticket Request <i>Persona: Customer</i>	A case type named Movie Ticket Request is created to represent the end-to-end booking process. Initial stage captures Movie Name, Show Date, Show Time, and Number of Tickets with validations. Associated with reusable Movie and Show data objects.
US-002	Check Show Availability <i>Persona: System / Booking Agent</i>	Availability stage verifies show capacity before advancing. Captures Seat Availability Status and Available Seats Count. Enforces validation preventing progression if requested tickets exceed capacity.
US-003	Calculate Booking Cost <i>Persona: System</i>	Configured within Availability stage to calculate Total Cost derived from Ticket Price * Number of Tickets using a declarative business calculation rule.
US-004	Confirm Booking Request <i>Persona: Customer</i>	Approval stage captures customer confirmation via Booking Status property. Confirmed bookings advance to execution; cancelled requests resolve as Resolved-Cancelled.
US-005	Maintain Movie and Show Data <i>Persona: System / Data Architect</i>	Reusable Movie (Movie Name, Genre) and Show (Show Date, Show Time, Seat Capacity) data objects defined independently and linked as data references to the case.
US-006	Review Booking Details <i>Persona: Customer</i>	Configured customer review interface displaying Movie Name, Show Timing, Number of Tickets, and calculated Total Cost in a structured read-only format before confirmation.
US-007	Process Ticket Booking <i>Persona: System / Fulfillment</i>	Booking Execution stage allocates seats and maintains tracking properties: Booking Confirmation Status, Seat Numbers, and unique Ticket ID.
US-008	Notify Booking Confirmation <i>Persona: System</i>	Automated Correspondence rule triggered upon case resolution to send email confirmation mapping Case ID, Movie Name, Show Date & Time, Seat Numbers, and Total Cost.
US-009	Define Booking SLA <i>Persona: System / Case Manager</i>	Simple SLA configured on Movie Ticket Request: Goal of 1 day (urgency +10) and Deadline of 2 days (urgency +20) for priority escalation.
US-010	Route Booking Request by Show Type <i>Persona: System</i>	Booking Execution routing based on Show Type property: routes to PremiumShowQueue for premium screenings and StandardShowQueue for standard shows without manual intervention.
